Printer Facts

1. Print-Copy Speed:

How fast does it print? Indicated as PPM or CPM (Pages per minute or Copies per minute).

2. Network Capable:

You can connect several computers to this printer using a 10/100 Network system.

3. Time to First Page/Copy:

How fast will the first page come out?

4. Print - Copy Resolution:

Print-Copy quality, the larger the number the better the quality. Indicated as dpi (dots per inch).

5. Paper Tray Capacity:

How many sheets of paper will the tray hold? The larger the number the less time wasted reloading the machine.

6. Fax vs PC Fax:

Fax will transmit your document upon scanning, it will also print incoming documents immediately. PC Fax means it scans the document to your computer first then faxes it, incoming faxes will be stored in your computer as documents.

7. Photo Printing:

Capability of printing borderless photos at very high resolutions.

8. Media Card Slots:

Most digital products now record the information, pictures, music on media cards in formats such as SD, Compact Flash, Memory Stick, etc. Some printers have slots that will read the information and print it directly off the card without need of a PC.

9. Auto Duplexing:

Capability of copying 2 pages and transferring them to the front and back of one page them on one.

10. Are cables included in the box?

Most printing products do not include connectivity cables. Make sure you order the cable you need.
