

How to Recycle at Work

Smarter Recycling.

Rubbermaid can help step you through a Smarter Recycling Program.

RECYCLING FACT:

MATERIALS GENERATED IN THE SOLID WASTE SYSTEM, BY WEIGHT 1999

- Paper
- Plastic
- Glass
- Food Wastes
- Metal
- Other
- Yard Wastes

SOURCE: MUNICIPAL SOLID WASTE IN THE U.S.: 1999 FACTS & FIGURES, U.S. ENVIRONMENTAL PROTECTION AGENCY

Rubbermaid Commercial Products has a complete line of recycling containers and sortation options. Specially designed and color coded containers and tops make collection and sortation easier and more efficient.

STEP 1

Place recycling containers as close to the sources of recyclable materials as possible.

- Rubbermaid's Deskside Recycling Containers make it easy to separate recyclable and non-recyclable waste.

STEP 2

Strategically locate large recycling stations in high-volume areas.

- Place larger containers for sortation near central location....like a copy center or cafeteria.

STEP 3

Optimize waste collection with a large capacity mobile sortation unit.

- Effective high capacity collection with continued sortation is made easy with a product like the Mega BRUTE®.

STEP 4

Save time and money by reducing trips to empty collected waste.

- Mega BRUTE® can easily transport four filled 55 gallon liners and has rear doors to ease handling of filled liners.

Work Smarter.
